

Fatsah TACHERFIOUT

Data Engineer & Cloud

Education

- **Big Data / Cloud Engineer Certification**
Dec. 2021
Fitec
- **Master's Degree in Mechatronics & Advanced Mechanics**
Sep. 2016
University of Technologie of Compiègne
- **Master's Degree in Electrical Engineering**
Sep. 2014
University of Bejaia

Professional Summary

Data Engineer with 5+ years of experience in designing, building, and optimizing data pipelines in cloud environments. Specialized in complex data system migrations and cloud implementations on **GCP** and **AWS**. Strong technical and analytical background combined with proven ability to work in Agile environments and collaborate with cross-functional teams.

Professional Experience

- **DATA ENGINEER CONSULTANT** Nov. 2022 - Present
Orange France, Arcueil
 - Analyzed legacy systems and collected existing scripts for migration purposes.
 - Configured GCP environments and migrated SQL scripts from Teradata to BigQuery.
 - Produced documentation and presented deliverables to stakeholders
 - Rewrote KSH scripts into optimized Python scripts.
 - Designed and developed data migration pipelines in Python.
 - Orchestrated workflows using Airflow.
 - Performed technical and functional validation (including iso-production checks).
 - Managed production deployment and technical cutover.**Tech stack: GCP, Airflow, Docker, GitLab, Python, Agile**
-

🏠 55 Rue Edouard Vaillant,
93140 Bondy France

Technical Skills

- **Cloud Platforms:** GCP (BigQuery, Composer, Cloud Storage, Dataflow, Firestore), AWS (S3, Glue, Athena, Data Catalog)
- **Data Engineering:** Data pipeline design & optimization, data migration, data modeling
- **Orchestration & Automation:** Airflow, CI/CD (GitLab)
- **Programming:** Python, PySpark, SQL, Java, KSH
- **Databases:** PostgreSQL, MySQL, SQL Server
- **Tools:** Talend, Docker
- **Other:** Algorithmic analysis, performance optimization, technical documentation

Languages

French: Fluent (C2)

Arabic: Fluent (C2)

English: Intermediate (B1)

Kabyle: Native

DATA ENGINEER CONSULTANT Jun 2022 - Nov. 2022

LISI AEROSPACE, Paris

- Built data ingestion pipelines to AWS S3 using Talend :
- Extracted and filtered M3 data based on business requirements.
- Automated ingestion of updated documentation files (last 24h changes) into S3
- Backend Data Platform Development:
 - Configured AWS Glue Crawlers to infer schemas and enrich the Data Catalog.
 - Developed ETL jobs using **AWS Glue (Spark)** for data processing and transformation.
 - Integrated processed data into AWS Data Catalog.
 - Enabled data exploration and querying using **AWS Athena (SQL)**
- Deliverables:
 - Business-ready filtered datasets from M3.
 - Centralized documentation stored in S3.
 - Enriched AWS Glue Data Catalog with metadata and schemas.
 - Fully operational ETL pipelines.
- **Tech stack: AWS, Talend, Python, Spark, GitLab, Agile**

Data Consultant & Algorithm Analyst May 2017- Mar 2020

Renault-Nissan-Mitsubishi, Lardy

- Analyzed simulation data to evaluate engine control and energy management strategies.
- Designed and modeled algorithms using **MATLAB / Simulink**.
- Developed validation and qualification test frameworks.
- Performed regression analysis to identify optimization opportunities.
- Produced technical reports and documentation.

Tech stack: MATLAB/Simulink, internal Renault tools

Key Strengths:

- ✓ Data pipeline design and optimization
- ✓ Cloud data migration (Teradata → BigQuery, AWS ecosystems)
- ✓ Workflow orchestration and automation
- ✓ Strong analytical and problem-solving mindset
- ✓ Agile collaboration and communication
- ✓ Technical documentation and stakeholder reporting
